

Our experience in Armenia

Our first action in Armenia started in 1993, following an exploratory mission, with the distribution of fuel in the orphanages of Yerevan and its surroundings, where the babies were enduring temperatures of -4° in the dormitories.

Since then, Mission Enfance's actions in Armenia have been carried out every year thanks to the involvement of Levon Gasparyan, our coordinator, Raffi Kamayan, our logistician and Arminé Kamayan, animator then coordinator.

Thanks to them :

- 20 schools rehabilitated in Armenia and Nagorno-Karabakh for 5,000 pupils,
- 18 constructions or rehabilitations of professional training centres, toy libraries, a psychological centre, a sports centre for the disabled, part of a computer centre in Tumo,
- School equipment (furniture) for 10 schools,
- 45,000 school kits distributed in Mission Enfance schools.
